

I Found Tiny Jesus

TINY JESUS - BIG IMPACT

Background Information:

I Found Tiny Jesus began as a simple idea during a period of deep personal rebuilding. After losing my mother in 2024 — the person who taught me hope, resilience, and compassion — I found myself searching for a way to honor the quiet way she lifted people up. In the middle of that grief, a small figurine became something unexpected: a symbol that could carry a message my mother lived by — that even the smallest acts can reach someone at exactly the right moment.

These figurines were already circulating online, being left in public places to inspire hope, a way to give people a moment of comfort, a pause in their day, a feeling of not being alone. Then it occurred to me — what if I paired the figure with a QR code and built a place for people to tell their story of what it was like to find one. From that spark, I began building the movement entirely from scratch — the structure, the quotes, the pages, the emotional tone, and the purpose behind every detail. Nothing about this project was accidental. It was crafted piece by piece, late nights and long days, fueled by a mix of grief, determination, and an honest desire to turn something small into something meaningful.

This movement was not built with money or a team behind it. It was built through persistence, personal sacrifice, and the belief that hope matters — especially for people who feel unseen. Every section of the website, every quote, every instruction has been shaped so that when someone finds a Tiny Jesus, they feel a moment of connection strong enough to share. The figurine is small, but the intention behind it is not.

At its core, I Found Tiny Jesus is about moments — moments of comfort, moments of recognition, moments where someone feels the world soften around the edges. These stories, once shared, become part of a larger human thread. And in that thread is the same truth my mother lived and taught: when you offer someone a little hope, it travels farther than you ever will.

This movement continues to grow because people recognize themselves in it — in the loneliness, in the surprise of being seen, and in the quiet impact of something unexpected. And now, these moments will reach even more people in more places, bringing hope to corners of the world my mother would have loved to see.
